

Teacher's Profile

Name: Dr. ABUL HASAN SARDAR

Department [Specialization]: MICROBIOLOGY

Position Holding: Assistant Professor and Head

Position Held [previous service]: (if any)

Name of the Employer	Position Held	Duration/Year	Remarks

Date of Joining in Sarsuna College: 22/09/2016

Contact Information: Email: abulhasansardar82@gmail.com Phone: (optional) 8820122772

Academic Qualification: **please do not mention the % of marks/ class/ grade**

Degree	College/University/Institution	Year
B.Sc. (Microbiology)	University of Calcutta	2002
M.Sc. (Microbiology)	University of Kalyani	2004

Ph. D.	Title of Thesis/ Project	College/University/Institution	Year
	“Studies on differential proteomic responses of <i>Leishmania donovani</i> under exposure to nitrosative and oxidative stress”	University of Calcutta	2015

Post Doctoral Research (if any):

Albany Medical Center, USA

Post Doctoral Fellow

January'2016-September'2016

Supervisor: Prof. Edmund J. Gosselin

Involved in development of recombinant peptide vaccine against deadly BSL-3 pathogen *Francisellatularancis*. In this study a recombinant protein molecule was generated fused with mannose binding protein 2 (MBL-2) and anti-hFcγ receptor. Then the protection efficacy of the vaccine was studied in the murine model using BSL-3 facility.

Indian Institute of Chemical Biology, Kolkata, India

Research Associate

January'2015- December'2015

Supervisor: Dr. Syamal Roy

Investigating the microRNA mediated immune regulation of host cell during *Leishmania donovani* infection. In this study first miRNA profiling of the *Leishmania donovani* infected vs. uninfected PECs (peritoneal exudate cells) from BALB/c mice was performed. Several miRNAs were found to be up-regulated among which three miRNAs were selected for further studies i.e. miR-30c, miR-33 and miR-155. We are now exploring how miR-155 regulates IFN-g-induced autophagy of the parasites through JAK-STAT signaling during *L. donovani* infection in mice model. We are also exploring how miR-30c and miR-33 regulate cholesterol and triglyceride homeostasis.

Research Interest: Oxidative Stress Biology of Visceral Leishmaniais. Differential Proteomics, Diagnosis of Visceral Leishmaniasis (VL) and Post-KalaAzar Dermal Leishmanisis (PKDL). Antimicrobial Peptide biology to develop new chemotherapeutic drugs against VL. Drug Resistance mechanism of Visceral Leishmanisis, Bacteria.

Area of Teaching: General Microbiology, Molecular Biology, Recombinant DNA technology, Biochemistry and Biophysical Chemistry.

Publication:

Projects:

a. Completed:

Name and Funding agency	Project Title	Duration/Year	Funding amount(Rs.)	Status/Remarks

b. Ongoing/ current :

Name and Funding agency	Project Title	Duration/Year	Funding amount(Rs.)	Status/Remarks
DST-SERB-TARE, Govt. Of India	Study the role of microRNA in the regulation of hypertriglyceridemia associated with active VL cases	3 years	18 lakhs 30 thousands	Ongoing

Ph. D Guidance/ Supervision:

Other Experiences: Post Graduate teaching at this College, or other college(s) / as Resource person / DDE teaching etc.

Technical experiences:

Immunology: Handling mice models (C57BL/6 and BALB/c) and different macrophage cell lines (J774, THP-1), ELISA, ELISPOT, working with PBMCs.

Microscopy: Fluorescence microscopy; Phase contrast microscopy.

Molecular Biology: Microarray; Vector construction and cloning of gene; Isolation DNA and RNA from protozoa and other types of cells; Plasmid DNA isolation; Transformation of bacteria; Expression of recombinant protein; Site-directed mutagenesis, generation of knock-out strains, Western blot; Northern Blot; Southern Blot; PCR; Semiquantitative PCR; Realtime PCR; DNA sequencing using automated DNA sequencer; Transfection by electroporation in Bacteria and Protozoa and other commonly used Molecular Biology techniques.

Biochemistry: Protein isolation and purification, 2-D Gel Electrophoresis, Quantitative proteomics (Mass Spectroscopy, large scale proteome data analysis), Enzyme assay, HPLC, FPLC, SDS and native polyacrylamide gel electrophoresis.

Spectroscopy: Ultraviolet, fluorescence, visible absorption; Spectroflurimetry.

Invited Lecture:**Other prestigious/ distinguished Post holding:****Membership of Learned Societies:**

- a) Annual Member of “The Indian Science Congress Association” for the year 2017-2018.
- b) Annual Member of the “Association of Microbiologists of India” for the year 2017-2018.
- c) Student member of the “Canadian National Proteomics Networks” for the year 2012

Other notable activities: (i) Convener of Ph. D. Committee/(ii) Coordinator/In charge of Instrument/ Projects, / (iii) Reviewer of various journals like: (a) ACS journals – Inorganic Chemistry; (b) RSC journals – / (iv) Examiner of Ph. D. thesis of other University / IIT./ (v) Reviewer of various Books/ Chapter/ Publisher / (vi) Officer/ Member of NCC/ NSS, (vii) Member of the Governing Body of Sarsuna College and/ or Other college(s) / (vii) Editor of College journals/ Magazine/ (viii) Chairman / Head of any selection committee.

Other notable activities: NSS member of Sarsuna College NSS committee.

Award/ Scholarship/ Fellowship:**Albany Medical Center, Albany, New York, USA**

Post Doctoral Fellow (NIH Grant)

2016

McGill University, Institute of Parasitology, Macdonald campus, Canada

Canadian Commonwealth Fellow

2011-2012

Canadian National Proteomics Travel Award

2012

Rajendra Memorial Research Institute of Medical Sciences, India

Senior Research Fellow

(Intramural Project, funded by Indian Council of Medical Research)

2012-2014

Senior Research Fellow

(LEISHDNAVAX project, Funded by European Commission)

2010-2012
