About Me

In order to promote a well-rounded learning experience, I go above and beyond lectures and practicals in my role as biology professor. I've planned visits and outings, and effectively handled a variety of college initiatives. Through this experience, I was able to improve my leadership and teamwork abilities while creating a welcoming and encouraging environment for the students. Since I place a high priority on student success, I actively seek out feedback and apply it to improve students' educational experiences. Due to my commitment, students have repeatedly given me high marks for satisfaction, praising my approachable and dynamic teaching style.
